

THE KAVERY ENGINEERING COLLEGE*(An Autonomous Institution)***UG/PG DEGREE END SEMESTER THEORY EXAMINATIONS, APRIL-MAY 2026****Second Semester****ME-Construction Engineering and Management****PCNT2422- CONSTRUCTION PLANNING, SCHEDULING AND CONTROL****Regulations - 2024****Duration: 3 Hrs.****Maximum: 100 Marks****PART – A (ANSWER ALL QUESTIONS) (Marks 10*2=20)**

Q.No	Questions	BTL	CO	Marks
1.	Define construction planning.	L1	1	2
2.	List the basic steps in project planning.	L1	1	2
3.	What is meant by work breakdown structure?	L2	2	2
4.	Explain the term “float” in project scheduling.	L1	2	2
5.	Differentiate CPM and PERT techniques.	L1	3	2
6.	What is a precedence diagram?	L2	3	2
7.	Define resource leveling.	L2	4	2
8.	Mention any two factors affecting resource scheduling.	L2	4	2
9.	What is project monitoring?	L2	5	2
10.	State the significance of earned value management.	L1	5	2

PART – B (ANSWER ALL QUESTIONS) (Marks 5*16 = 80)

Q.No	Questions		BTL	CO	Marks																																							
11. a	i	Explain the stages in developing a construction plan.	L2	1	8																																							
	ii	Discuss the importance of defining work tasks with suitable example.	L2	1	8																																							
Or																																												
b	i	Explain any one of the methods for estimating activity durations.	L2	1	8																																							
	ii	Describe the coding systems used in construction planning.	L2	1	8																																							
12. a	A Construction project consists of 12 activities are given below,		L3	2	16																																							
<table><tr><td>Activity</td><td>A</td><td>B</td><td>C</td><td>D</td><td>E</td><td>F</td><td>G</td><td>H</td><td>I</td><td>J</td><td>K</td><td>L</td></tr><tr><td>Predecessors</td><td>-</td><td>-</td><td>-</td><td>A</td><td>C</td><td>B,E</td><td>A</td><td>C</td><td>D,F</td><td>D,F</td><td>I,H</td><td>G,J,K</td></tr><tr><td>Duration (Weeks)</td><td>6</td><td>8</td><td>7</td><td>7</td><td>4</td><td>9</td><td>8</td><td>4</td><td>5</td><td>4</td><td>6</td><td>9</td></tr></table>			Activity	A	B	C	D	E	F	G	H	I	J	K	L	Predecessors	-	-	-	A	C	B,E	A	C	D,F	D,F	I,H	G,J,K	Duration (Weeks)	6	8	7	7	4	9	8	4	5	4	6	9			
Activity	A	B	C	D	E	F	G	H	I	J	K	L																																
Predecessors	-	-	-	A	C	B,E	A	C	D,F	D,F	I,H	G,J,K																																
Duration (Weeks)	6	8	7	7	4	9	8	4	5	4	6	9																																

a) Draw Project Network. (4)

b) Arrive the critical path. (4)

c) Calculate EST, EFT, LST, LFT and Floats. (8)

Or

- b A Construction project consists of 7 activities. The time estimates (in weeks) of different activities are given below: L3 2 16

Activity	1-2	1-3	1-4	2-5	3-5	4-6	5-6
Optimistic Time	1	1	2	1	2	2	3
Most probable Time	1	4	2	1	5	5	6
Pessimistic Time	7	7	8	1	14	8	15

- a) Draw Project Network. (4)
b) Arrive the critical path. (4)
c) Calculate the variances & Standard deviation of the project length.(4)
d) Assess the probability of completing the project 3 weeks earlier than the expected time. (4)

Take:

Normal Deviation		-0.9	-1.0	-1.1
Probability		18.4	15.9	13.6

13. a i Apply the precedence relationships to identify critical and non-critical activities. L3 3 8
ii Illustrate how leads and lags affect project scheduling. L3 3 8

Or

- b i Apply PDM for analyzing interdependent activities. L3 3 8
ii Compare precedence network with arrow diagram method. L3 3 8

14. a i Analyze resource constraints in project scheduling. L4 4 8
ii Examine the impact of resource allocation on project delay. L4 4 8

Or

- b i Analyze the steps are involved in line of balance scheduling for repetitive works. L4 4 8
ii Evaluate time–cost trade-off techniques with example. L4 4 8

15. a i Evaluate various cost control methods used in construction. L5 5 8
ii Assess the role of earned value management in project control. L5 5 8

Or

- b i Judge the effectiveness of project performance review techniques. L5 5 8
ii Recommend suitable corrective actions for project cost overruns. L5 5 8
